

PERRY INTERNATIONAL, LTD.

VIJAY CHITLA

SCHEDULE DELAY ANALYST & PROJECT CONTROLS MANAGER/SCHEDULER

- Mr. Chitla has 20 years of international project experience in portfolio management, project controls, and claims.
- His specialty expertise is the application and utilization of Primavera P6 scheduling software for the development and updating of project schedules including resource and cost loading, and in the preparation of delay analyses. He is also an experienced scheduler with Primavera P3, Suretrak, and MS Project scheduling software.
- His global experience includes the construction and management of large databases for the scheduling of government construction projects and agency programs, and the delivery of large and technically complex EPC projects. His construction project experience is wide ranging including classified security facilities, mega-infrastructure projects, heavy transportation projects, and large buildings such as hotels and shopping malls.
- As a lead scheduler, he has supported clients in a variety of roles including participating in bid preparation and review, baseline schedule development, overseeing all project control functions including management and updating of the project schedule, and preparation of delay analyses to substantiate contractor claims.
- He is a highly experienced forensic delay analyst and is regularly involved in appointments as the lead analyst for technically complex civil construction projects given his degrees in architecture and construction management.
